EDUCATION

University of Auckland	Auckland, New Zealand
<i>Bachelor of Science, Major in Computer Science Expected Nov. 2026</i>	<i>Mar. 2024 – Present</i>

EXPERIENCE

Full Stack Developer + Co-Designer → Project Manager	Mar. 2025 – Present
<i>Web Development Consulting Club (WDCC) · UoA Investment Club (UAIC)</i>	<i>Auckland CBD, Hybrid</i>
- Leading full-stack development for 400+ members across 12 agile sprints, cutting annual platform costs by 80%. - Implementing authentication and event registration systems for secure user access and member workflows. - Developing a real-time portfolio tracker and integrated Stripe payments using React and Node.js. - Optimising sign-up flow, improving registration UX under a high \$20 membership fee constraint. - Integrated PayloadCMS as a headless CMS to manage backend content and support non-technical administration. - Implementing user analytics to track registration funnel, page engagement, and drop-off rates.	
Freelance Video Editor + Creative	Jun. 2025 – Present
<i>The Morning Marketer, Glide Media, The Aspiring Founder</i>	<i>Remote</i>
- Produce 15 short-form videos per month for 3+ clients, optimising retention, engagement, and external CTA clicks. - Built a profitable freelance studio from scratch, independently acquiring and retaining 3+ long-term clients. - Managed end-to-end creative pipeline from brief to delivery, operating as a solo creative studio.	
Marketing Executive – Photography + Videography	Jul. 2025 – Present
<i>University of Auckland Compsci Society (UOACS)</i>	<i>On-Site</i>
- Grew UOACS social media presence by +200% over 6 months through targeted short-form content. - Generated 1.1M+ views on a single Instagram post through optimised video content. - Applied data-driven audience segmentation to improve engagement and grow reach.	

PROJECTS

Slidedown <i>TypeScript, Next.js, pdfjs-dist, JSZip</i>	2026
- Engineered client-side PDF and PPTX parsers using pdfjs-dist and JSZip, supporting files up to 50MB. - Built split-pane converter UI with live word count, byte reduction, and page count stats. - Reduced slide payloads by ~70%, compressing 30+ decks from MBs to KBs for LLM free-tier limits.	
Interlood <i>TypeScript, Next.js, Node.js, Socket.IO, Express, Tailwind CSS</i>	2026
- Engineered real-time multiplayer platform with Next.js & Socket.IO, with session persistence and reconnection logic. - Designed extensible OOP architecture (User → Host/Player, Room → GameRoom) enabling multiple game modes. - Implemented a room system with unique 6-character codes, real-time tracking, and disconnect handling. - Engineered socket handling to prevent duplicate connections and maintain session state.	
Bindr <i>Python, Flask, SQLite, Pytest, HTML/CSS</i>	2025
- Built RESTful API with server-side search and normalised SQLite schema across a 10,000+ recipe dataset. - Implemented backend using Flask and SQLite with Pytest testing across 5 dynamic pages.	
Personal Portfolio Website <i>TypeScript, Next.js, React, Tailwind CSS, Resend</i>	2026
Dual-purpose platform serving as developer portfolio and freelance business site, driving client inquiries via rate-limited email automation through Resend.	

AWARDS

Web3 Hackathon <i>Kiawana Prize: Best NZ-Centric Solution (\$3K)</i>	Mar. 2025
Led a winning team against 50+ participants; recognised by crypto executives for technical depth and NZ impact.	
UoA Scientific Hackathon <i>Executive's Choice Award</i>	Apr. 2025
Built "Robin," an AI-powered rubbish detection prototype in a 5-hour sprint with Auckland Council.	
SESA x WDCC Hackathon <i>Best Presentation Award (\$200)</i>	Sep. 2024
Recognised for technical storytelling and presentation design under time pressure.
