EDUCATION

University of Auckland <i>Bachelor of Science, Major in Computer Science</i>	Auckland, New Zealand <i>Mar. 2024 – Present</i>
--	---

EXPERIENCE

Full Stack Developer + Co-Designer → Project Manager <i>Web Development Consulting Club (WDCC) · UoA Investment Club (UAIC)</i> • Leading development of a full-stack platform serving 400+ members across 12 fortnightly agile sprints, reducing annual platform costs by 80%. • Implementing authentication and event registration systems for secure user access and member workflows. • Developing a real-time portfolio tracker and integrated Stripe payments using React and Node.js. • Optimising sign-up flow, improving registration UX under a high \$20 membership fee constraint. • Integrated PayloadCMS as a headless CMS to manage backend content and support non-technical administration.	Mar. 2025 – Present <i>Auckland CBD, Hybrid</i>
Video Editor + Creative <i>The Morning Marketer, Glide Media, The Aspiring Founder</i> • Produce 15 short-form videos per month for 3+ clients, optimising retention, engagement, and external CTA clicks. • Build scalable editing workflows using Premiere Pro, After Effects, Final Cut Pro and motion graphics tools.	Jun. 2025 – Present <i>Remote</i>
Marketing Executive – Photography + Videography <i>University of Auckland Compsci Society (UOACS)</i> • Grew UOACS social media presence by +200% over 6 months through targeted short-form content. • Generated 1.1M+ views on a single Instagram post through optimised video content. • Applied data-driven audience segmentation to improve engagement and grow reach.	Jul. 2025 – Present <i>On-Site</i>

PROJECTS

Interlood <i>TypeScript, Next.js, Node.js, Socket.IO, Express, Tailwind CSS</i> • Built a real-time multiplayer web platform using Next.js and Socket.IO for browser-based interactive games. • Designed extensible OOP architecture (User → Host/Player, Room → GameRoom) enabling multiple game modes. • Implemented a room system with unique 6-character codes, real-time tracking, and disconnect handling. • Engineered socket handling to prevent duplicate connections and maintain session state.	2026
Bindr <i>Python, Flask, SQLite, Pytest, HTML/CSS</i> • Built a full-stack recipe web app with 5 pages and integrated a 10,000+ recipe dataset supporting search and filtering. • Developed dynamic recipe pages with ingredients, instructions, and nutrition data. • Implemented backend using Flask and SQLite with Pytest testing.	2025
Personal Portfolio Website <i>Typescript, Next.js, React, Tailwind CSS, Resend</i> • Developed a production-ready portfolio using Next.js with server-side rendering and optimised delivery. • Implemented caching, lazy loading, and responsive media handling for performance.	2026

AWARDS

Web3 Hackathon <i>Kiawana Prize: Best NZ-Centric Solution (\$3K)</i> • Led a winning team against 50+ participants to build a decentralised ecosystem. • Presented concept to crypto executives; recognised for technical depth and NZ impact.	Mar. 2025
UoA Scientific Hackathon <i>Executive's Choice Award</i> • Built "Robin," an AI-powered rubbish detection system to reduce recycling contamination. • Developed a working prototype in a 5-hour sprint with Auckland Council and Youth Climate Collective.	Apr. 2025
SESA x WDCC Hackathon <i>Best Presentation Award (\$200)</i> • Delivered a clear technical presentation to mixed audiences. • Recognised for storytelling and presentation design under time pressure.	Sep. 2024

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, C, SQL, HTML/CSS
Frameworks & Libraries: React, Next.js, Node.js, Express, Socket.IO, Flask
Databases & Backend: MongoDB, REST APIs, PayloadCMS
Tools & Platforms: Git, GitHub, Tailwind CSS, Resend, Stripe, Figma, pnpm, Agile
