Education

University of Auckland — Auckland, New Zealand
Bachelor of Science, Computer Science | *Expected Feb. 2027* — *Mar. 2024 - Feb. 2027*

Experience

Software Engineering Intern — Jun. 2026 - Present
Motorfy — *Auckland CBD, Hybrid*
- Leading architecture planning for the V1.5 SMS-driven job-quote flow across admin portal, backend, and mobile app
- Evaluated Twilio SMS integration and designed a fraud-prevention verification flow for service-plan redemption
- Backfilled **100+** Jest unit tests across quote, payment, batch, and auth services that had shipped untested
- Used Docker, LocalStack, and GitHub Actions CI/CD for local/prod parity; updated the Terraform base image
- Preparing an AWS RDS MySQL 8.0 to 8.4 Blue/Green upgrade; parameterised per-env engine versions in Terraform

Full-Stack Developer — Jul. 2026 - Present
Capstone Project, CS Capstones Community Platform — *Auckland, Hybrid*
- Built a courses directory end-to-end: search/filter/sort, CSV export, and a course-creation flow with drafts
- Built a reusable shadcn/ui component library documented via Storybook (**10+** stories)
- Designed a normalised PostgreSQL schema on AWS RDS for versioned, multi-coordinator course data
- Automated PR lifecycle notifications (opened, merged, review requested) via a GitHub webhook

Full-Stack Developer → Project Manager — Mar. 2025 - Present
Web Development Consulting Club (WDCC) / UoA Investment Club (UAIC) — *Auckland CBD, Hybrid*
- Leading full-stack development for a platform serving **400+** members, cutting annual platform costs by **80%**
- Architected authentication, event registration, and a Stripe-integrated portfolio tracker in React/Node.js
- Set up Vitest and React Testing Library testing; rolled out a design-token system across the component library
- Integrated PayloadCMS and analytics to optimise sign-up UX and the registration funnel

Marketing Executive - Photography + Videography — Jul. 2025 - Present
University of Auckland Compsci Society (UOACS) — *On-Site*
- Grew UOACS social presence by **+200%** in 6 months; **1.1M+** views on a single Instagram post

Projects

Slidedown | *Next.js, TypeScript, Tailwind CSS, shadcn/ui, pdfjs-dist, JSZip, Vercel* — 2026
- Built a fully client-side PDF/PPTX-to-text converter so students can feed lecture slides to AI tools privately
- Cuts slide payloads by roughly **70%**, compressing **30+** decks from MBs to KBs to stay within AI context limits

Bindr | *Python, Flask, SQLAlchemy, SQLite, Pytest* — 2025
- Built a RESTful API with server-side search across a **10,000+** recipe dataset on a normalised SQLite schema
- Designed a nutrition-based health-rating algorithm and wrote Pytest coverage across **5** dynamic pages (3-person team)

Personal Portfolio Website | *Next.js, TypeScript, React, Tailwind CSS, Resend* — 2025
- Dual-purpose developer portfolio and freelance business site driving client inquiries via rate-limited email automation

Awards

Web3 Hackathon | *Kiawana Prize: Best NZ-Centric Solution ($3K)* — Mar. 2025
- Led a winning 4-person team

UoA Scientific Hackathon | *Executive's Choice Award* — Apr. 2025
- Built "Robin," an AI rubbish-detection prototype in a 5-hour sprint with Auckland Council

SESA x WDCC Hackathon | *Best Presentation Award ($200)* — Sep. 2024

Technical Skills

Languages: TypeScript/JavaScript, Python, SQL, Java, C, HTML/CSS | **Frameworks & Libraries**: React, Next.js, Node.js, NestJS, Express, Flask, Socket.IO, Tailwind CSS | **Databases & Backend**: PostgreSQL, MySQL, MongoDB, SQLite, TypeORM, SQLAlchemy, PayloadCMS, REST APIs, Swagger, Stripe | **Cloud & DevOps**: AWS (S3, RDS, SES, SQS), Docker, LocalStack, Terraform, GitHub Actions | **Testing & Tools**: Jest, ts-jest, Vitest, Pytest, Storybook, Git, Turborepo, Nx, Figma, Agile
